

Michigan Association & Nonprofit 2017 Compensation & Benefits Survey Report

Since 1980, MSAE has been Michigan's source for association benchmarking data. In conjunction with an independent entity, MSAE surveys members to gather data on benefits and compensation for chief executive officers and association staff. The result is an easily used report that covers more than eighty different positions.

The report provides data specific to not-for-profit organizations in the state of Michigan, as well as a national appendix for a broader scope, so you're only buying data you can use.
